#### KITCHEN BENCH TOP – by Granite Transformations

Colour : Polar Ice.

Polar Ice is an engineered solid stone product manufactured using crushed granite and recycled clear glass combined with a special polymer resin to create a scratch, heat and stain resistant surface. The colour is designed to evoke thoughts of the polar ice caps. It is a cool white colour with the recycled glass content giving it depth and icy undertones

All Granite Transformations products are a 6.5mm thick engineered stone made from a number of different base ingredients such as crushed granite, seashells and recycled glass from beer bottles and car windscreens, as well as recycled porcelain

and mirrors. All of our products carry a 10 year Warranty and a vast range of colours are available to suit any interior design.

The product is designed to go straight over the top of your existing benchtop, so it's a cheaper and faster solution to demolishing your kitchen and starting again. Granite Transformations kitchen renovations generally only take a day and can give you a kitchen that looks totally new at a fraction of the cost of a new rebuild.
